

# Elementary Learning Games

For Windows XP & Vista  
and Mac OS 9 & OS X

## Master Gecko's Home Row

### Typing

Learn to type, or improve your typing skills, with this one-of-a-kind adventure game. Help Master Gecko find the lost scrolls, and explore a vast world of magical landscapes and labyrinths, 81 screens in all! Watch your progress in words per minute and keystrokes per hour, as you move through Master Gecko's world and have endless hours of fun and learning. With different levels for different skills and adventures, this game is great whether you're a novice or an expert. The CD also contains our Teacher's Edition features, including a teacher's guideline plus automatic tracking to record a child's learning.

## GeoRunner

### World Geography

*GeoRunner* is a multimedia CD-ROM world exploration game with 105 levels of play in 15 different stages of difficulty. Children learn the continents, countries, capital cities, landmarks, oceans, seas and rivers of the world, plus a multitude of fascinating facts, and have fun in the process. With *GeoRunner*, you search the world with propeller planes and jet planes to find hidden keys. You'll be amazed how quickly any child can learn world geography with this product. We have incorporated our Teacher's Edition features into the software, including a teacher's guideline plus automatic tracking to record a child's learning.

## The Great Galaxy Grid Game

### Science

*The Great Galaxy Grid Game* is planetary exploration at its best, with more than 300 stages of play. Unlike any other educational CD we have ever seen, *The Great Galaxy Grid Game* successfully combines astronomy and strategic thinking. Children learn a multitude of fascinating facts about the solar system and simultaneously exercise critical thinking ability. On this journey to the planets, children encounter our space grid and navigate past hidden traps to intercept space probes that provide the knowledge to advance in the game. We have incorporated our Teacher's Edition features into the software, including a teacher's guideline plus automatic tracking to record progress.

## Capt. Smartbeard's Scholarly Sea Adventure

### Verbal, Math & Logic Skills

Verbal, math and logic skills are the foundation for elementary school success. Join Captain Smartbeard and his crew as they search for treasure on the high seas. Use your verbal, analytical, and mathematical skills to find pieces of the lost treasure maps, and then sail past whirlpools, sea monsters and mermaids to find your prize. This product also contains our trademark Teacher's Edition features, including a teacher's guideline and automatic tracking to record a child's progress. With 108 levels of play in 4 different games, and a virtually infinite array of questions, this game is a tremendous learning tool for elementary school children.

## Professor Eggword's Discovery

### Spelling and Vocabulary

Learn elementary school spelling and vocabulary the fun way with *Professor Eggword's Discovery*. With 27 levels of play and nearly 5000 vocabulary words, this product is ideal for all elementary school grades. In *Professor Eggword's Discovery*, the professor has discovered some peculiar eggs in the heart of the jungle, and he needs help to hatch them. He has a machine that is powered by correct words, and he needs someone to spell and learn the words. We have incorporated our Teacher's Edition features into the software, including a teacher's guideline plus automatic tracking to record a child's learning.
