

# Preschool Learning Games

For Windows XP & Vista  
and Mac OS 9 & OS X

## ODS Amazing Art Corner

### Creative Art

*Amazing Art Corner* taps into a child's creative side, enabling any preschooler to create original computer-generated artwork. There are two creative art modes: automatic and manual. On automatic, the child operates various controls that influence patterns of art that are generated. On manual mode, the child paints in a more traditional manner, except that the paintbrush leaves a trail of colored balls. *ODS Amazing Art Corner* encourages artistic experimentation, and the fun artwork that is created promotes enjoyment of art. The Teacher's Edition features included in the product provide guidelines to help get the most out of this amazing product.

## ODS Air Explorer

### U.S. Geography

*ODS Air Explorer* teaches U.S. geography in a game with planes searching for hidden keys. Children are never too young to learn the basics of geography, and you'll be amazed how quickly and easily they learn with this program. *ODS Air Explorer* contains 11 levels of learning to ensure that your preschooler is always entertained and always learning something new. This product contains our Teacher's Edition features that include a teacher's guideline plus automatic tracking to record a child's progress.

## ODS Character Creator

### Creative Art

Any preschool child can make fun, funny faces with this unique creative art product. *ODS Character Creator* provides an opportunity for young children to experiment with faces and figures, and create artwork that's truly their own—there are literally more than one quadrillion different characters (that's a 1 followed by 15 zeros) that can be created using this product. Children can make characters that look like their friends or family, or experiment with whacky hairstyles and funny faces. There are so many possible combinations it will make your head spin.

## ODS Robot Challenge

### Memory Matching

*ODS Robot Challenge* is a memory-matching game that has 40 levels, everything from basic face-up matching to highly complex face-down randomly-moving triple matching. Each level is carefully designed to provide an incremental mental challenge that will delight preschool children. All challenges are randomly generated to ensure nearly endless possibilities. You'll be amazed at how children respond to this product and how quickly their skills improve. This product contains our Teacher's Edition features that include a teacher's guideline plus automatic tracking to record a child's progress.

## ODS Carnival Math (in English and Spanish)

### Math

Learn simple addition and subtraction the fun way with *ODS Carnival Math*. Answer the math questions correctly to ring a carnival bell and drop Blit, our funny cartoon character, into a carnival dunk tank. There are 36 levels of play to ensure almost endless hours of fun learning. This product contains our Teacher's Edition features, including a teacher's guideline plus automatic tracking to record a child's progress.
